

**INTEGRATED ACADEMIC
STUDIES OF MEDICINE**

CLINICAL PROPEDEUTICS

THIRD YEAR OF STUDIES

academic year 2024/2025.

CLINICAL PROPEDEUTICS - IASMI28

Course:

CLINICAL PROPEDEUTICS

The course carries 8 ECTS.

It has 135 classes of active teaching (3 classes of lectures per week and 6 classes of work in a small group per week)

TEACHERS AND ASSOCIATES:

SN	Name and surname	E-mail address	title
1.	Nataša Zdravković	natasasilvester@gmail.com	Full professor
2.	Nebojša Anđelković	andjelkovicboka@gmail.com	Full professor
3.	Aleksandra Lucic Tomic	atomiclucic@gmail.com	Full professor
4.	Vladimir Miloradović	vanja.miloradovic@gmail.com	Full professor
5.	Goran Davidović	medicusbg@yahoo.com	Full professor
6.	Ivan Čekerevac	icekerevac@gmail.com	Full professor
7.	Violeta Iric-Ćupić	wwwvikica@ptt.rs	Full professor
8.	Svetlana Djukić	drsvetlanadjukic@gmail.com	Full professor
9.	Mirjana Veselinović	miraveselinovic.m@gmail.com	Full professor
10.	Tatjana Lazarević	tatjanalazarevickg@gmail.com	Associate professor
11.	Vladimir Zdravković	vladazdrav@gmail.com	Associate professor
12.	Violeta Mladenović	vikicam2004@gmail.com	Assistant professor
13.	Vojislav Ćupurdija	vojacup@gmail.com	Associate professor
14.	Danijela Jovanović	daziv81@yahoo.com	Assistant professor
15.	Rada Vučić	rada.vucic@gmail.com	Assistant professor
16.	Miodrag Srecković	sreckovic7@gmail.com	Assistant professor
17.	Jelena Vuckovic-Filipović	jelenvufi@gmail.com	Assistant professor
18.	Tomislav Nikolić	nikolic.s.tomislav@gmail.com	Assistant professor
19.	Željko Todorović	todorovic_zeljko@hotmail.com	Assistant professor
20.	Vladimir Ignjatović	vladaig@yahoo.com	Assistant professor
21.	Stefan Simović	simovicst@gmail.com	Assistant
22.	Jelena Zivic	jelena.zy@gmail.com	Assistant
23.	Dragana Bubanja	drbubanja@gmail.com	Assistant

COURSE STRUCTURE:

Name of the module	Duration (weeks)	Lectures Per week	Work in a small group	Teacher
Clinical propaedeutics	15	3	6	Violeta Mladenović, Assistant professor
				$\Sigma 45 + 90 = 135$

EVALUATION:

The grade is equivalent to the number of earned points (see table). Points are earned in three ways:

ACTIVITY DURING THE LESSON:

In this way, the student can earn up to 15 points. During the last class of work in a small group, the student answers 2 exam questions from that week's lessons and, based on the demonstrated knowledge, gains 0-1 points. Attendance at lectures is mandatory.

MODULE TEST: In this way, the student can earn up to 15 points. The test has 30 questions. Each correct answer carries 0,5 point.

FINAL EXAM: In this way, a student can gain up to 70 points. The first part is practical exam (the final skills assessment: involves the student taking a medical history, conducting a physical examination of the patient), the student can gain up to 20 points. If the student does not pass the final skills assessment, she/he can not proceed to the oral part of the exam. The second part of the final exam is oral exam, entails the student orally answering five posed questions (each question is worth 0-10 points). In order to pass the final exam, the student must achieve a minimum of more than 50%+1 points. Final course grade based upon total point (see table).

MODULE: Clinical propaedeutics			
Knowledge assessment (maximum number of points 100)			
Pre-exam activities	points	Final exam	points
Lectures		Written exam	
Practices	15	Practical exam	20
Test	15	Oral exam	50
			Σ 100

CONSULTATIVE TEACHING: Consultations can be scheduled by the teacher - head of the course: Violeta Mladenović, Assistant professor, (vikicam2004@gmail.com)

The final grade is formed as follows:

In order for a student to pass the course, she/he must obtain a minimum of 51 points.

In order to pass the course, the student must obtain a minimum of 51 points and pass all modules.

To pass the module the student must:

1. obtain more than 50% points in that module
2. acquire more than 50% of the points provided for the activity in teaching in each module
3. pass the module test, i.e. have more than 50% correct answers.

number of points won	rating
0 - 50	5
51 - 60	6
61 - 70	7
71 - 80	8
81 - 90	9
91 - 100	10

All lectures are on the website of the Faculty of Medical Sciences: www.medf.kg.ac.rs

COURSE CONTENT:

TEACHING UNIT 1 (FIRST WEEK):

PROPEDEAUTICS AS A MEDICAL DISCIPLINE

lectures 3 classes

Propedeutics as a medical discipline
Principles of work of doctors and medical ethics
The concept of health and disease
Anamnesis - methodology of collecting symptoms of the disease

What the student needs to know:

The anamnesis and anamnesis parts
The concept of symptoms and signs of disease
The most important symptoms and signs of diseases of certain systems and organs

Practical teaching 6 classes
(follows theoretical teaching)

Introducing students to the components of the anamnesis

Introducing students to the concepts of symptoms and signs of illness

What the student needs to know:

To independently take a complete medical history from the patient
To know how to interpret the symptoms and signs of the disease present in patients

TEACHING UNIT 2 (SECOND WEEK):

ANAMNESIS AND OBJECTIVE PHYSICAL EXAMINATION

lectures 3 classes

Concept of health and disease
Objective physical examination and general inspection. Head and neck examination
Methodology for collecting disease signs

What a student should know:

Concept of anamnesis and parts of anamnesis
Concept of symptoms and signs of disease
The most important symptoms and signs of diseases of individual systems and organs

Practical teaching 6 classes
(follows theoretical teaching)

Taking an anamnesis from the patient, indicating the basic symptoms and signs of the disease

What a student should know:

To independently take a complete medical history from the patient
To know how to interpret the symptoms and signs of the disease present in the patient
Assessment of vital parameters (measurement of temperature and pulse, blood pressure, number of respirations).
General inspection. Head and neck examination.

TEACHING UNIT 3 (THIRD WEEK):

PROPEDEUTICS OF THE HEART AND BLOOD VESSELS 1

lectures 3 classes

Physical examination of the heart and great blood vessels

What a student should know:

Basics of examination of the heart and great blood vessels
Examination by the method of inspection, palpation, percussion and auscultation
Auscultation points
Heart sounds and murmurs. Noise classification

Practical teaching 6 classes
(follows theoretical teaching)

Examination of the heart and blood vessels: history, inspection, palpation, auscultation of the heart (heart sounds and murmurs), palpation of the pulse, interpretation of the ECG.

Presentation of patients with heart diseases and familiarization with basic diagnostic procedures in cardiology

What a student should know:

The most important symptoms and signs of cardiac diseases

Basics of examination of the heart and great blood vessels
Examination by the method of inspection, palpation, percussion and auscultation by the student
Auscultation points
Heart sounds and murmurs. Noise classification
The most important symptoms and signs of cardiac diseases
Independent taking of anamnestic data in patients with various cardiac diseases

TEACHING UNIT 4 (FOURTH WEEK):

PROPEDEUTICS OF THE HEART AND BLOOD VESSELS 2

lectures 3 classes

Physical examination of the heart and great blood vessels

What a student should know:

Basics of examination of the heart and great blood vessels

Examination by the method of inspection, palpation, percussion and auscultation

Auscultation points

Heart sounds and murmurs.

Noise classification

The most important symptoms and signs of cardiac diseases

Practical teaching 6 classes
(follows theoretical teaching)

Examination of the heart and blood vessels: history, inspection, palpation, auscultation of the heart (heart sounds and murmurs), palpation of the pulse, interpretation of the ECG.

Presentation of patients with heart diseases and getting to know with basic diagnostic procedures in cardiology

What a student should know:

Basics of examination of the heart and great blood vessels

Examination by the method of inspection, palpation, percussion and auscultation by the student

Auscultation points. Heart sounds and murmurs. Noise classification

The most important symptoms and signs of cardiac diseases

Independent taking of anamnestic data in patients with various cardiac diseases

TEACHING UNIT 5 (FIFTH WEEK):

PROPEDEUTICS OF THE RESPIRATORY ORGANS 1

lectures 3 classes

Physical examination of the chest and respiratory organs

What a student should know:

Objective examination of the chest wall

Objective examination of the respiratory organs

Propedeutics of the respiratory system: symptoms and signs of the disease and

Practical teaching 6 classes
(follows theoretical teaching)

Examination of the chest and lungs: history, topography of the chest, inspection, palpation, percussion and auscultation.

Presentation of patients with diseases of the respiratory tract and acquaintance with basic diagnostic procedures in pulmonology

Acquaintance of students with an objective examination of the chest wall, respiratory organs

Acquaintance of students with the most important symptoms and signs of disease in patients with diseases of the respiratory organs

What a student should know:

History taking, objective examination of the chest and respiratory organs in a pulmonology patient by students

TEACHING UNIT 6 (SIXTH WEEK):

PROPEDEUTICS OF THE RESPIRATORY ORGANS 2

lectures 3 classes

Physical examination of the chest and respiratory organs

What a student should know:

Objective examination of the chest wall

Objective examination of the respiratory organs

Propedeutics of the respiratory system: symptoms and signs of the disease and

Practical teaching 6 classes
(follows theoretical teaching)

Examination of the chest and lungs: history, topography of the chest, inspection, palpation, percussion and auscultation.

Presentation of patients with diseases of the respiratory tract and acquaintance with basic diagnostic procedures in pulmonology

Acquaintance of students with an objective examination of the chest wall, respiratory organs

Acquaintance of students with the most important symptoms and signs of disease in patients with diseases of the respiratory organs

What a student should know:

History taking, objective examination of the chest and respiratory organs in a pulmonology patient by students

TEACHING UNIT 7 (SEVENTH WEEK):

PROPEDEUTICS OF THE HEMATOPOIESIS SYSTEM 1

lectures 3 classes

Physical examination of the hematopoietic system

Symptoms and signs of disease in patients with diseases of the hematopoietic system

Peculiarities of the anamnesis in patients with diseases of the hematopoietic system

What a student should know:

The most important symptoms and signs of diseases of the hematopoietic system

Symptoms and signs in patients with diseases of the hematopoietic system

Examination by the method of inspection, palpation, percussion and auscultation

Practical teaching 6 classes
(follows theoretical teaching)

Examination of the spleen and lymph glands.

Presentation of patients with diseases of the hematopoietic system, and acquaintance with diagnostic procedures in hematology.

Acquaintance of students with the symptoms and signs of diseases in patients with diseases of the hematopoietic system

Objective examination of patients with diseases of hematopoietic system

What a student should know:

The most important symptoms and signs of diseases of the hematopoietic system

Independent taking of anamnestic data in patients with various diseases of hematopoietic system

TEACHING UNIT 8 (EIGHTH WEEK):

PROPEDEUTICS OF THE HEMATOPOIESIS SYSTEM 2

lectures 3 classes

Physical examination of the hematopoietic system

Symptoms and signs of disease in patients with diseases of the hematopoietic system

Peculiarities of the anamnesis in patients with diseases of the hematopoietic system

What a student should know:

The most important symptoms and signs of diseases of the hematopoietic system

Symptoms and signs in patients with diseases of the hematopoietic system

Examination by the method of inspection, palpation, percussion and auscultation

Practical teaching 6 classes
(follows theoretical teaching)

Examination of the spleen and lymph glands.
Presentation of patients with diseases of the hematopoietic system, and acquaintance with diagnostic procedures in hematology.
Acquaintance of students with the symptoms and signs of diseases in patients with diseases of the hematopoietic system

Objective examination of patients with diseases of hematopoietic system

What a student should know:

The most important symptoms and signs of diseases of the hematopoietic system

Independent taking of anamnestic data in patients with various diseases of hematopoietic system

TEACHING UNIT 9 (NINTH WEEK):

PROPEDEUTICS OF THE DIGESTIVE ORGANS 1

lectures 3 classes

Physical examination of the abdomen and abdominal organs

Getting to know the topographical position of the abdominal organs

Symptoms and signs in diseases of the esophagus, stomach, small intestine and large intestine

Importance of physical methods of examining the abdomen: inspection, palpation, percussion, auscultation of the abdomen

What a student should know:

What are the specific symptoms in diseases of the gastrointestinal tract

Knowledge of the basic physical methods of examining the abdomen

Application of additional diagnostic methods in diseases of the gastrointestinal tract

Practical teaching 6 classes
(follows theoretical teaching)

Acquaintance of students with an objective examination of the abdomen, symptoms and signs of disease in patients with diseases of the digestive organs.

Examination of the abdomen and abdominal organs: history taking, inspection, superficial and deep palpation, percussion, examination of the liver, examination of free fluid in the abdomen, digitorectal examination.

Presentation of patients with diseases of the digestive system and acquaintance with diagnostic procedures in gastroenterology

What a student should know:

Independent taking of anamnestic data in patients with various diseases of the digestive organs

The most important symptoms and signs in diseases of the digestive organs

Examination by the method of inspection, palpation, percussion and auscultation

TEACHING UNIT 10 (TENTH WEEK):

PROPEDEUTICS OF THE DIGESTIVE ORGANS 2

lectures 3 classes

Physical examination of the abdomen and abdominal organs

Getting to know the topographical position of the abdominal organs

Practical teaching for 6 classes
(follows theoretical teaching)

Acquaintance of students with an objective examination of the abdomen, symptoms and signs of disease in patients with diseases of the digestive organs.

Symptoms and signs in diseases of the esophagus, stomach, small intestine and large intestine

Importance of physical methods of examining the abdomen: inspection, palpation, percussion, auscultation of the abdomen

What a student should know:

What are the specific symptoms in diseases of the gastrointestinal tract

Knowledge of the basic physical methods of examining the abdomen

Application of additional diagnostic methods in diseases of the gastrointestinal tract

Examination of the abdomen and abdominal organs: history taking, inspection, superficial and deep palpation, percussion, examination of the liver, examination of free fluid in the abdomen, digitorectal examination.

Presentation of patients with diseases of the digestive system and acquaintance with diagnostic procedures in gastroenterology

What a student should know:

Independent taking of anamnestic data in patients with various diseases of the digestive organs

The most important symptoms and signs in diseases of the digestive organs

Examination by the method of inspection, palpation, percussion and auscultation

TEACHING UNIT 11 (THE ELEVENTH WEEK):

PROPEDEUTICS OF THE KIDNEYS AND URINARY TRACTS 1

lectures 3 classes

Physical examination of the kidney and urinary tract

Peculiarities of the anamnesis in patients with kidney and urinary tract disease

Objective signs and symptoms that indicate kidney and urinary tract disease

What a student should know:

Knowledge of basic physical methods of kidney and urinary tract examination

Application of additional diagnostic methods in kidney and urinary tract diseases

Practical teaching 6 classes
(follows theoretical teaching)

Acquaintance of students with an objective examination and symptoms and signs of disease in patients with kidney and urinary tract disease

Examination of the kidneys and urinary system: history, inspection, palpation, succussion.

Presentation of patients with urinary tract disease and familiarization with diagnostic procedures in nephrology

History taking, objective examination of patients with kidney disease by students

What a student should know:

The most important symptoms and signs in kidney and urinary tract diseases

Independent taking of anamnestic data in patients with various kidney and urinary tract diseases

Examination by the method of inspection, palpation, percussion and auscultation

TEACHING UNIT 12 (THE TWELFTH WEEK):

PROPEDEUTICS OF THE KIDNEYS AND URINARY TRACTS 2

lectures 3 classes

Physical examination of the kidney and urinary tract

Peculiarities of the anamnesis in patients with kidney and urinary tract disease

Objective signs and symptoms that indicate kidney and urinary tract disease

Practical teaching 6 classes
(follows theoretical teaching)

Acquaintance of students with an objective examination and symptoms and signs of disease in patients with kidney and urinary tract disease

What a student should know:

Knowledge of basic physical methods of kidney and urinary tract examination

Application of additional diagnostic methods in kidney and urinary tract diseases

Examination of the kidneys and urinary system: history, inspection, palpation, succussion.

Presentation of patients with urinary tract disease and acquaintance with diagnostic procedures in nephrology

History taking, objective examination of patients with kidney disease by students

What a student should know:

The most important symptoms and signs in kidney and urinary tract diseases

Independent taking of anamnestic data in patients with various kidney and urinary tract diseases

Examination by the method of inspection, palpation, percussion and auscultation

TEACHING UNIT 13 (THIRTEENTH WEEK):

PROPEDEUTIC OF THE GLANDS WITH INTERNAL SECRETION 1

lectures 3 classes

Physical examination of the endocrine glands

Peculiarities of the anamnesis in patients with diseases of glands with internal secretion

Physical examination of patients with diseases of the endocrine glands

What a student should know:

Symptoms and signs of hyper and hypofunction of endocrine glands

Examination by the method of inspection, palpation, percussion and auscultation

Practical teaching for 6 classes
(follows theoretical teaching)

Acquaintance of students with the symptoms and signs of diseases of endocrine glands

Acquaintance of students with an objective examination of the patients with diseases of endocrine glands

Presentation of patient with diseases of glands with internal secretion, and introduction to diagnostic procedures in endocrinology.

Objective examination of patients with diseases of glands with internal secretion

What a student should know:

Independent taking of anamnestic data in patients with various diseases of the endocrine glands

The most important symptoms and signs of hyper and hypofunction of endocrine glands

Examination of endocrine glands: history and physical examination.

TEACHING UNIT 14 (FOURTEENTH WEEK):

PROPEDEUTIC OF THE GLANDS WITH INTERNAL SECRETION 2

lectures 3 classes

Physical examination of the endocrine glands

Peculiarities of the anamnesis in patients with diseases of glands with internal secretion

Physical examination of patients with diseases of the endocrine glands

What a student should know:

Practical teaching for 6 classes
(follows theoretical teaching)

Acquaintance of students with the symptoms and signs of diseases of endocrine glands

Acquaintance of students with an objective examination of the patients with diseases of endocrine glands

Symptoms and signs of hyper and hypofunction of endocrine glands
Examination by the method of inspection, palpation, percussion and auscultation

Presentation of patient with diseases of glands with internal secretion, and introduction to diagnostic procedures in endocrinology.
Objective examination of patients with diseases of glands with internal secretion
What a student should know:
Independent taking of anamnestic data in patients with various diseases of the endocrine glands
The most important symptoms and signs of hyper and hypofunction of endocrine glands
Examination of endocrine glands: history and physical examination.

TEACHING UNIT 15 (FIFTEENTH WEEK):

PROPEDEUTICS OF THE LOCOMOTOR SYSTEM

lectures 3 classes

Physical examination of the locomotor apparatus

Characteristics of anamnesis in diseases of the locomotor system

Objective inspection of the locomotor system

What the student needs to know:

The most important symptoms and signs of locomotor system disease

Inspection by inspection, palpation, percussion and auscultation method

Practical teaching 6 classes
(follows theoretical teaching)

Examination of the extremities: history taking and physical examination.

Introducing students to an objective examination of the locomotor system

Introducing students to the symptoms and signs in patients with locomotor system disease

What the student needs to know:

The most important symptoms and signs of locomotor system disease

Examination by the method of inspection, palpation, percussion and auscultation method

Independent use of anamnestic data in patients with various diseases of the locomotor system

WEEKLY COURSE SCHEDULE

FRIDAY

HALL AT THE INTERNAL CLINIC

09:00 – 11:15

PRACTICE

FRIDAY

(INTERNAL CLINIC)

12:00 – 16:30

CLASS SCHEDULE FOR CLINICAL PROPEDEUTICS

week	type	lecture title	teacher/assistant
1.	L	Propedeutics as a medical discipline	Assistant professor Violeta Mladenović
	P		Teaching assistants:*** Assistant Professor Danijela Jovanović Assistant Professor Miodrag Srecković Assistant Professor Rada Vučić Assistant Professor Tomislav Nikolic Assistant Professor Željko Todorović Assistant Professor Vladimir Ignjatović Assistant Jelena Živić Assistant Anita Sarić Assistant Dragana Bubanja Assistant Stefan Simović
2.	L	Anamnesis and objective physical examination	Assistant professor Violeta Mladenović
	P		Teaching assistants: ***
3.	L	Propedeutics of the heart and blood vessels 1	Assistant Professor Miodrag Srecković
