PubMed Help

Last Update: December 10, 2010.

PubMed comprises over 20 million citations for biomedical literature from MEDLINE, life science journals, and online books. PubMed citations and abstracts include the fields of medicine, nursing, dentistry, veterinary medicine, the health care system, and preclinical sciences. PubMed also provides access to additional relevant Web sites and links to the other NCBI molecular biology resources.

PubMed is a free resource that is developed and maintained by the National Center for Biotechnology Information (NCBI), at the U.S. National Library of Medicine (NLM), located at the National Institutes of Health (NIH).

Publishers of journals can submit their citations to NCBI and then provide access to the full-text of articles at journal Web sites using LinkOut.

For a brief overview of searching PubMed, see the Quick Start section.

FAQs

Go to:

- How can I get the full-text article?
- How do I find consumer health information about a disease or condition?
- How can I limit citations to my reference management system?

Myocardial fibrosis detected by cardiac magnetic resonance imaging in heart failure: Impact on remodeling, diastolic function and BNP levels.

Babür Güler G, Karahmet T, Tigen K.

Cardiology Clinic, Kartal Koşuyolu Training and Research Hospital, Istanbul, Turkey. mktigen@yahoo.com.

Abstract

Myocardial fibrosis, progressive over-accumulation of extracellular matrix (ECM) components in cardiac muscle, defined as a key component of heart failure and since then various studies showed a strong connection between fibrosis and progression of heart failure. The impaired left ventricular diastolic and systolic functions that are originated by fibrosis are used to predict poor clinical outcome in dilated cardiomyopathy. Even though endomyocardial biopsy is still considered as a gold standard, various noninvasive imaging techniques have been used to detect presence, location and extend of myocardial fibrosis. Cardiac magnetic resonance emerged as a crucial noninvasive imaging technique because of its high accuracy and high fidelity in detection of fibrosis. The noninvasive assessment of fibrosis is advantageous in early prediction of possible adverse outcomes and creates an opportunity to utilize new therapeutic approaches that target fibrosis in heart failure.

Са десне стране „filter your results“ – Formats PDF

The image displays three sequential screenshots from a Mozilla Firefox browser window, illustrating the process of filtering search results on PubMed and accessing a full-text article.

Top Screenshot: PubMed Search Results

The browser window shows the PubMed website. The search bar contains "PubMed" and the search button is highlighted. The search results are displayed on the left, showing a list of 6 results. The first result is "Depression under stress: ethical issues in genetic testing" by Newson AJ, Br J Psychiatry. 2009 Sep;195(3):189-90. The right sidebar shows the "Filter your results:" section with options to "All (27)", "Review (2)", and "Free Full Text (6)". The "Find related data" section is also visible.

Middle Screenshot: PubMed Abstract View

The browser window shows the PubMed abstract view for the article "Depression under stress: ethical issues in genetic testing" by Newson AJ. The abstract text is displayed, along with the PMID: 19721104. The right sidebar shows the "Full Text" button and the "Related citations" section.

Bottom Screenshot: British Journal of Psychiatry Article View

The browser window shows the full-text article view on the British Journal of Psychiatry website. The article title is "Depression under stress: ethical issues in genetic testing" by Newson AJ. The right sidebar shows the "BJPsych" logo and a list of links including "HOME", "HELP", "FEEDBACK", "SUBSCRIBE", "ARCHIVE", "SEARCH", "TABLE OF CONTENTS", and "This Article". The article content is displayed in the main area.

Advanced Search – такође 27 резултата

The image shows a screenshot of the PubMed Advanced Search interface in a Mozilla Firefox browser. The browser's address bar displays the URL <http://www.ncbi.nlm.nih.gov/pubmed/advanced>. The page title is "PubMed advanced search - Mozilla Firefox".

The main heading is "PubMed Advanced Search". Below it, there is a "Search Box" with a search bar and buttons for "Limits", "Details", "Help", "Search", "Preview", and "Clear".

The "Search Builder" section shows a dropdown menu set to "Author" and a text input field containing "Newson AJ". There are buttons for "Add to Search Box" and "Show Index".

The "Search History" section displays a table of "Most Recent Queries":

| Search | Time | Result |
|----------------------|----------|--------|
| #14 Search Newson AJ | 20:38:07 | 27 |
| #13 Search Newson | 20:37:00 | 332 |
| #12 Search Watson JD | 20:36:10 | 373 |
| #11 Search Watson | 20:35:30 | 29077 |
| #3 Search heart | 20:35:10 | 982913 |

Below the table are links for "More History" and "Clear History", and a link for "Search History Instructions".

The bottom section shows the search results for "Newson AJ[Author]". The results are displayed in a list format, showing the first four results:

1. [Should Non-Invasiveness Change Informed Consent Procedures for Prenatal Diagnosis?](#)
Deans Z, Newson AJ.
Health Care Anal. 2010 Mar 9; [Epub ahead of print]
PMID: 20217481 [PubMed - as supplied by publisher]
[Related citations](#)
2. [Personal genomics as an interactive web broadcast.](#)
Newson AJ.
Am J Bioeth. 2009 9(6-7):27-9. No abstract available.
PMID: 19998109 [PubMed - indexed for MEDLINE]
[Related citations](#)
3. [Depression under stress, ethical issues in genetic testing.](#)
Newson AJ.
Br J Psychiatry. 2009 Sep;195(3):189-90.
PMID: 19721104 [PubMed - indexed for MEDLINE] [Free Article](#)
[Related citations](#)
4. [Dr GD Monteith: an unobtrusive Wellington surgeon who became coroner, provincial surgeon and hospital superintendent.](#)
Newson AJ.
Anaesth Intensive Care. 2009 Jul;37 Suppl 1:15-15.

On the right side of the results, there is a "Filter your results:" section with a dropdown menu set to "All (27)". Below it are links for "Review (2)" and "Free Full Text (6)".

At the bottom right, there is a "Find related data" section with a dropdown menu set to "Database: Select" and a "Find items" button.

Претрага по имену часописа – British Medical Journal око 175.000 резултата

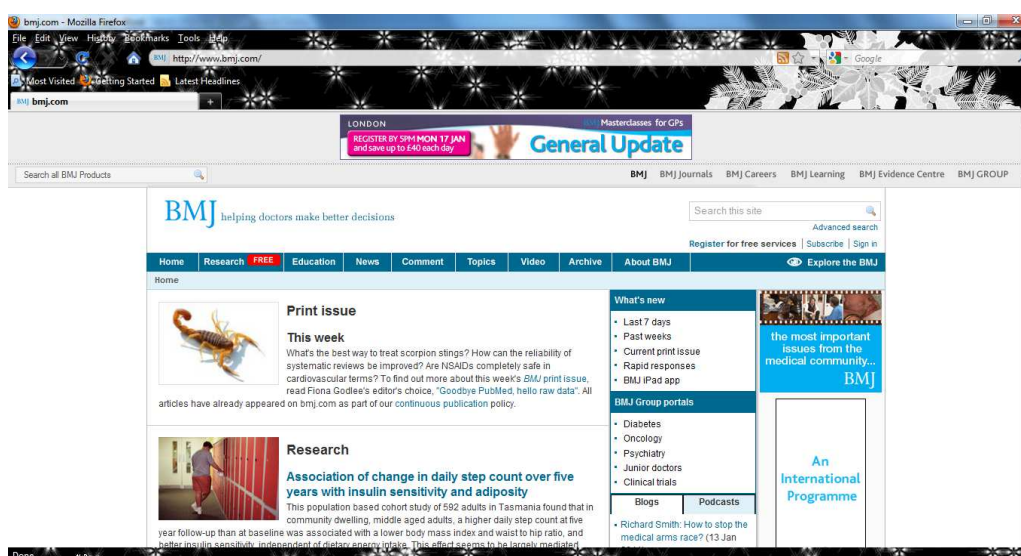

The screenshot shows the PubMed website interface in a Mozilla Firefox browser. The search bar at the top contains 'British Medical Journal'. The results page displays 'Results: 1 to 20 of 174972'. The first four results are listed, each with a checkbox, a title, authors, journal information, and PMID. | Title | "Narrativa di frontiera". Fenomenologia di una forma aperta. |
| Author | Giustini, Francesco |
| Subject(s) | L-FIL-LET/14 Critica letteraria e letteratura comparata |
| Abstract | "Fiction of frontiers. Phenomenology of an open form/voice. Francesco Giustini's PhD dissertation fits into a genre of research usually neglected by the literary criticism which nevertheless is arousing much interest in recent years: the relationship between Literature and Space. In this context, the specific issue of his work consists in the category of the Frontier including its several implications for the XX century fiction. The preliminary step, at the beginning of the first section of the dissertation, is a semantic analysis: with precision, Giustini describes the meaning of the word "frontier" here declined in a multiplicity of cultural, political and geographical contents, starting from the American frontier of the pioneers who headed for the West, to the exotic frontiers of the world, with whose the imperialistic colonization has come into contact from the semi-uninhabited areas like deserts, highlands and virgin forests, to the ethnic frontiers between Indian and white people in South America, since the internal frontiers of the Countries like those ones between the District and the Capital City, the Centre and the Outskirts. In the next step, Giustini wants to focus on a real "myth of the frontier", able to nourish cultural and literary imagination. Indeed, the literature has told and chosen the frontier as the scenery for many stories, especially in the 20th Century it made the frontier a problematic space in the light of events and changes that have transformed the perception of space and our relationship with it. Therefore, the dissertation proposes a critical category: it traces the hallmarks of a specific literary phenomenon defined "Fiction of the frontier", present in many literary traditions during the 20th Century. The term "Fiction" (not "Literature" or "Poetics") does not define a genre but rather a "procedure", focusing on a constant issue pointed out from the texts examined in this work: the strong call to the act of narration and to its oral traditions. The "Fiction of the Frontier" is perceived as an approach to the world, a way of watching and feeling the objects, an emotion that is lived and told through the story: a story where the narrator, through his body and his voice, takes the rule of the witness. The following parts, that have an analytic style, are constructed on the basis of this |

venire "Fiction of the Frontier" appears in many literary traditions during the 20th century. The term "Fiction" (not "Literature" or "Poetics") does not define a genre but rather a "procedure", focusing on a constant issue pointed out from the texts examined in this work: the strong call to the act of narration and to its oral traditions. The "Fiction of the Frontier" is perceived as an approach to the world, a way of watching and feeling the objects, an emotion that is lived and told through the story: a story where the narrator, through his body and his voice, takes the rule of the witness. The following parts, that have an analytic style, are constructed on the basis of this theoretical and methodological reflection. The second section gives a wide range of examples into we can find the figure and the myth of the frontier through the textual analysis which range over several literary traditions. Starting from monographic chapters (García Márquez, Callado, McCarthy), to the comparative reading of couples of texts (Calvino and Verga, Uexa, Buzzati and Coetzee, Arguedas and Rulfo). The selection of texts is introduced so as to underline a particular aspect or a form of the frontier at every reading. This section is articulated into thematic voices which recall some actions that can be taken into the ambiguous and liminal space of the frontier (to communicate, to wait, to "trans-culture", to imagine, to live in, to not-live in). In this phenomenology, the frontier comes to the light as a physical and concrete element or as a cultural, imaginary, linguistic, ethnic and existential category. In the end, the third section is centered on a more defined and elaborated analysis of two authors, considered as fundamental for the comprehension of the "Fiction of the frontier": Joseph Conrad and João Guimarães Rosa. Even if they are very different, being part of unlike literary traditions, these two authors show many connections which are pointed by the comparative analysis. Maybe Conrad is the first author that understand the feeling of the frontier, freeing himself from the adventure romance and from the exotic nineteenth century tradition. João Guimarães Rosa, in his turn, is the great narrator of Brazilian and South American frontier, he is the man of sertão and of endless spaces of the Centre of Brazil. His production is strongly linked to that one belonged to the author of Heart of Darkness.
