

Clinical Medicine 2

**Year of Study
IV**

school year 2025/2026

Psychiatry

Subject:

PSYCHIATRY

The subject is evaluated with 6 ECTS (European Credit Transfer and Accumulation System) credits. There are 6 hours of active teaching per week (3 hours of lectures and 3 hours of small group work).

TEACHERS AND COLLABORATORS:

	Name and surname	Email	academic title
1.	Goran Mihajlovic	drgoranmih@gmail.com	Full Professor
2..	Dragana Ignjatovic Ristic	draganaristic4@gmail.com	Full Professor
3.	Mirjana Jovanovic	drminjaj@yahoo.com	Full Professor
4.	Vladimir Janjic	vladadok@yahoo.com	Full Professor
5.	Milica Borovcanin	milicaborovcanin@yahoo.com	Full Professor
6.	Branimir Radmanovic	biokg2005@yahoo.com	Associate Professor
8.	Nemanja Muric	nmuric91@gmail.com	Teaching Assistant
10.	Milena Stojkovic	milena-stojkovic94@live.com	Teaching Associate
11.	Natasa Minic	natasaminic92@gmail.com	Teaching Associate

Course Structure

Module	Module Title	Week	Lectures per week	Small Group Work per week	Module Coordinator
1	General psychopathology and non-psychotic disorders	6	3	3	Profesor Goran Mihajlovic
2	Psychotic disorders and Brain organic syndrome (BOS)	4	3	3	Professor Goran Mihajlovic
3	Special Topics in Psychiatry	5	3	3	Professor Goran Mihajlovic
					$\Sigma 45+45=90$

Assessment:

Activity during Classes:

Students can earn up to 15 points through participation in class activities. This involves answering two exam questions during the last small group session each week. Points are awarded based on demonstrated knowledge (0-1 point).

Final Tests per Module:

Students can earn up to 25 points through module-specific final tests. The exact scoring is based on an attached table.

Final Examination and Skills Assessment:

Students can earn up to 60 points through the final examination and skills assessment. The skills assessment involves evaluating a patient with a mental disorder, including a psychiatric interview, medical history, mental status, summaries, differential-diagnostic considerations, additional examinations, and a treatment plan (up to 15 points). The final examination consists of answering three questions, which students draw from predefined question groups (up to 15 points per question). To pass the exam, students must earn more than 50% of the points in the skills assessment.

Module		MAXIMUM POINTS			
		Activity during classes	Tests per modules	Final examination and skills assessment	Σ
1	General psychopathology and non-psychotic disorders	6	10		16
2	Psychotic disorders and Brain organic syndrome (BOS)	4	7		11
3	Special Topics in Psychiatry	5	8		13
				60	60
Σ		15	25	60	100

CONSULTATIVE TEACHING: Consultations can be scheduled with the head of the department and the course coordinator, **professor dr. Mirjana Jovanović** (drminjaj@yahoo.com).

The final grade is formed as follows:

For a students to pass the course, they must acquire a minimum of 55 points, pass all modules, and pass the final exam.

To pass a module, a student must:

1. Obtain more than 50% of the points in that module.
2. Earn more than 50% of the points allocated for class participation in each module.
3. Score more than 50% on the module's oral examination.
4. Pass the test for that module, i.e., have more than 50% correct answers.
5. Earn more than 50% on the final skills assessment.

total points earned	grade
0-50	5
51-60	6
61-70	7
71-80	8
81-90	9
91-100	10

Tests by modules

MODULE 1.

FINAL TEST
0-10 POINTS

ASSESSMENT OF THE FINAL TEST

The test has 20 questions.
Each question is worth 0.5 points

MODULE 2.

FINAL TEST
0-7 POINTS

ASSESSMENT OF THE FINAL TEST

The test has 14 questions.
Each question is worth 0.5 points

MODULE 3.

FINAL TEST
0-8 POINTS

ASSESSMENT OF THE FINAL TEST

The test has 16 questions.
Each question is worth 0.5 points

School program:

FIRST MODULE: GENERAL PSYCHOPATHOLOGY AND NON-PSYCHOTIC DISORDERS

Teaching Unit 1 (First Week):

Subject: History of the Development of Psychiatry and General Psychopathology

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none">• Historical development of psychiatry.• The concept of mental health and mental illness.• Notions and subjects of psychology and psychiatry.• General psychopathology, covering disorders of consciousness, attention, perception, thinking, memory, intelligence, emotions, instincts, and will.	<ul style="list-style-type: none">• Specifics of the doctor-patient relationship, establishing contact with individuals with mental disorders.• Examination of psychiatric patients and psychiatric interview – presentation of a person with a mental disorder.• Medical history (anamnesis), somatic and neurological findings, mental status, psychiatric summaries, provisional conclusion.

Teaching Unit 2 (Second Week):

Subject: Etiology, Classification, and Diagnosis of Mental Disorders, Personality Theories

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none">• Structure and Theories of Personality, Defense Mechanisms• Etiology of Mental Disorders• Classification of Mental Disorders Using the International Classification of Diseases of the World Health Organization, Tenth Revision (ICD-10)• Using the Diagnostic and Statistical Manual of Mental Disorders of the American Psychiatric Association, Fifth Revision (DSM-V)• Diagnosis of Mental Disorders• Supplementary Methods in Examining Patients with Mental Disorders• Physical and Biological Examination Methods	<ul style="list-style-type: none">• Presentation of a Patient with a Mental Disorder• Non-verbal Communication (Facial expressions, posture, patient's motor skills) and Establishing Verbal Contact• Conducting an Interview and Examining Mental Functions Independently

Subjects: Personality Disorders, Eating Disorders, Sleep Disorders and Sexual Disorders

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none"> • Classification and Diagnosis of Personality Disorders • Specific Personality Disorders: <ul style="list-style-type: none"> Paranoid Personality Disorder Schizoid Personality Disorder Antisocial Personality Disorder Borderline Personality Disorder Histrionic Personality Disorder Narcissistic Personality Disorder Avoidant Personality Disorder Dependent Personality Disorder Obsessive-Compulsive Personality Disorder Passive-Aggressive Personality Disorder • Eating Disorders: <ul style="list-style-type: none"> Anorexia, Bulimia • Sleep Disorders 	<ul style="list-style-type: none"> • Clinical Practice Examples: <ul style="list-style-type: none"> • Examples from clinical practice related to personality disorders, eating disorders, sleep disorders, and sexual disorders. • Presentation of Patients with Disorders: <ul style="list-style-type: none"> Demonstration of a patient with a personality disorder. Demonstration of a patient with an eating disorder. Demonstration of a patient with a sleep disorder. Demonstration of a patient with a sexual disorder. • Conducting Interviews and Examining Psychological Functions Independently: <ul style="list-style-type: none"> Independent conduct of interviews and examination of psychological functions for patients with personality disorders. Independent conduct of interviews and examination of psychological functions for patients with eating disorders. Independent conduct of interviews and examination of psychological functions for patients with sleep disorders. Independent conduct of interviews and examination of psychological functions for patients with sexual disorders.

Subject: Neurotic and Stress-Related Disorders

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none"> • Neurotic Disorders • Phobias: <ul style="list-style-type: none"> Agoraphobia Social phobias Specific (isolated) phobias • Other Anxiety Disorders: <ul style="list-style-type: none"> Panic disorder Generalized anxiety disorder Mixed anxiety and depressive disorder Obsessive-Compulsive Disorder • Reaction to Severe Stress and Adjustment Disorders: <ul style="list-style-type: none"> Acute stress reaction Post-traumatic stress disorder Adjustment disorders Dissociative (Conversion) Disorders • Somatoform Disorders: <ul style="list-style-type: none"> Somatization disorder Hypochondriasis 	<ul style="list-style-type: none"> • Clinical Examples of Neurotic Disorders: <ul style="list-style-type: none"> Observation of real-world examples of neurotic disorders in clinical practice. • Presentation of Patients with Various Disorders: <ul style="list-style-type: none"> Demonstration of a patient with a specific phobia. Demonstration of a patient with panic disorder. Demonstration of a patient with generalized anxiety disorder. Demonstration of a patient with mixed anxiety and depressive disorder. Demonstration of a patient with obsessive-compulsive disorder. • Conducting Interviews and Examining Psychological Functions Independently: <ul style="list-style-type: none"> Independent conduct of interviews and examination of psychological functions for patients with specific phobias, panic disorder, generalized anxiety disorder, mixed anxiety and depressive disorder, or obsessive-compulsive disorder. • Clinical Examples of Stress-Related Disorders: <ul style="list-style-type: none"> Observation of real-world examples of acute stress reactions, post-traumatic stress disorder, adjustment disorders, dissociative disorders, somatization disorders, or hypochondriasis. • Presentation of Patients with Various Stress-Related Disorders: <ul style="list-style-type: none"> Demonstration of a patient with an acute stress reaction. Demonstration of a patient with post-traumatic stress disorder. Demonstration of a patient with an adjustment disorder. Demonstration of a patient with a dissociative disorder. Demonstration of a patient with a somatization disorder. Demonstration of a patient with hypochondriasis. • Conducting Interviews and Examining Psychological Functions Independently: <ul style="list-style-type: none"> Independent conduct of interviews and examination of psychological functions for patients with neurotic disorders. • Visit and Familiarization with the Operations of the Psychiatric Day Hospital: <ul style="list-style-type: none"> A tour and introduction to the working regimen of the Psychiatric Day Hospital.

Teaching Unit 5 (Fifth Week):

Subject: Addictology 1 - Alcohol Dependency

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none"> • Neurobiology of Addiction • Diagnosis and Toxicology • Alcohol Pharmacology • Pharmacological aspects related to alcohol. • Intoxication • Abstinence Crisis • Alcohol Addiction Criteria • Psychiatric Consequences of Alcoholism • Dual Disorders • Somatic Comorbidities: • Therapeutic Procedures - Medication 	<ul style="list-style-type: none"> • Clinical Vignettes: • Case studies or clinical scenarios illustrating aspects of alcohol dependency. • How to Recognize Alcohol Dependency: • Diagnostic Criteria for Alcoholism: • Special Populations and Alcohol: • Diagnostics and Clinical Tests: • Psychosocial Treatments:

Teaching Unit 6 (Sixth Week):

Subject: Addictology 2 - Substance Dependence

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none"> • Psychoactive substances-types and pharmacology • Neurobiology of chemical addiction • Abstinence crisis and tolerance • Intoxication, overdose • Treatment models • Non-chemical dependencies 	<ul style="list-style-type: none"> • Clinical vignettes • Diagnostic criteria of addiction to different PAS • Diagnostic and clinical tests • Opiate addiction treatment/substitution therapy

SECOND MODULE: PSYCHOTIC DISORDERS AND BRAIN ORGANIC SYNDROME (BOS)

Teaching Unit 7 (Seventh Week):

Brain organic syndrome (BOS)

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none"> • Delirium (due to altered blood flow in the brain, structural damage to the brain, systemic infections, in sensitive patients, metabolic disorders, endocrinopathies, poisoning, abstinence syndrome) • Dementia (in Alzheimer's disease, vascular, other forms of dementia and dementia in other diseases) • Non-pharmacological and pharmacological treatment of delirium and dementia 	<ul style="list-style-type: none"> • Examples of delirium and dementia from clinical practice • Presentation of a patient with delirium and dementia • Self-interviewing and examining the psychological functions of a patient with delirium and dementia • The suffering of caregivers of patients with dementia • Psychogeriatrics

Teaching Unit 8 (Eighth Week):

Subjects: Schizophrenia, Schizotypal Disorders, and Delusional disorders

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none">• Schizophrenia - history, concept• Etiopathogenesis of schizophrenia• Clinical manifestation of schizophrenia, positive and negative symptoms of schizophrenia• Clinical forms of schizophrenia (paranoid, hebephrenic, catatonic, undifferentiated, residual, simple schizophrenia and post-schizophrenic depression)• Schizoaffective disorder	<ul style="list-style-type: none">• Examples of schizophrenia from clinical practice• Presentation of a patient with schizophrenia• Self-interviewing and examination of the psychological functions of a patient with schizophrenia

Teaching Unit 9 (ninth week):

Subjects: Schizophrenia, Schizotypal Disorders, and Delusional disorders 2

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none">• Diagnosis, differential diagnosis, prognosis and course of schizophrenic disorders• Therapy of schizophrenic disorders• Paranoid psychoses (persecutory paranoia, vindictive paranoia, passionate psychoses)• Paranoid psychoses• Induced delusional disorders• Paraphrenia• Diagnosis, differential diagnosis, prognosis and course of delusional disorders• Therapy of delusional disorders• Reactive conditions in psychiatry• Symptomatic psychoses	<ul style="list-style-type: none">• Specifics of cognitive changes, deterioration of the personality of patients with schizophrenia and the possibility of achieving remission and recovery• Therapeutic protocols in the treatment of patients with schizophrenia• Examples of delusional disorders from clinical practice• Presentation of a patient with delusional disorder• Self-interviewing and examination of the psychological functions of a patient with a delusional disorder• Presentation of a patient with reactive psychosis, presentation of a patient with symptomatic psychosis

Teaching Unit 10 (Tenth Week):

Subject: Mood Disorders

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none">• Mood disorders• Depressive disorder (unipolar depression, recurrent depressive disorder, dichotomous divisions of depression: endogenous and reactive, primary and secondary, agitated and inhibited)• Special forms of depression: depression with symptoms of melancholia, seasonal depression, masked depression• Bipolar mood disorder• Manic episode of bipolar disorder• Cyclothymia and dysthymia• Suicide• Diagnosis, differential diagnosis, prognosis and course of recurrent depressive disorder and bipolar mood disorder• Therapy of mood disorders	<ul style="list-style-type: none">• Examples of mood disorders from clinical practice• Presentation of a patient with depressive disorders• Presentation of a patient with bipolar disorder• Self-interviewing and examining the psychological functions of a patient with mood disorders• Therapeutic protocols in the treatment of patients with mood disorders

THIRD MODULE: SPECIAL TOPICS IN PSYCHIATRY

Teaching Unit 11 (Eleventh Week):

Subject: Child and Adolescent Psychiatry

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none"> • Child and adolescent psychiatry • Mental retardation • Autistic disorder • Rett's syndrome, Asperger's syndrome • Hyperkinetic disorder • Tic disorder • Enuresis and encompres • Adolescent psychiatry and adolescent crisis • Therapy of disorders with onset in childhood and adolescence 	<ul style="list-style-type: none"> • Examples of mental problems of childhood and adolescence from clinical practice • Presentation of a patient with mental disorders of childhood and adolescence • Self-interviewing and examination of the psychological functions of a patient with a childhood or adolescent mental disorder

Teaching Unit 12 (Twelfth Week):

Subject: Therapy in Psychiatry - Biological Therapy

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none"> • Antipsychotics • Antidepressants • Mood stabilizers • Anxiolytics and hypnotics • Medicines used in the treatment of dementia • Electroconvulsive therapy 	<ul style="list-style-type: none"> • Indications for drug use, clinical aspects of drug use (term of polypharmacy) and possible side effects • The concept of compliance • Getting to know the practical aspects of applying electroconvulsive therapy • Presentation of therapeutic protocols for patients with psychiatric disorders

Teaching Unit 13 (Thirteenth Week):

Subject: Therapy in Psychiatry - Psychotherapy and Socioterapy

Lecture duration: 3 hours	Exercises duration: 3 hours
<ul style="list-style-type: none"> • Psychotherapy (classical psychoanalysis and psychodynamic psychotherapy) • Supportive therapy • Cognitive - behavioral therapy • Group therapy • Family therapy • Transactional analysis • Socioterapy (day, night and weekend hospitals, clubs, occupational therapy) • Organization of institutions for the treatment of mental disorders - the concept of destigmatization • Psychiatry in the community 	<ul style="list-style-type: none"> • Possibilities of applying psychotherapeutic and sociotherapeutic techniques - presentations and practical application exercises • Therapeutic community • Community psychiatry - Counseling Centers and Mental Health Centers

Teaching Unit 14 (Fourteenth Week):

• **Subject: Emergency conditions in psychiatry and consultative (Liaison) psychiatry**

Lecture duration: 3 hours

- The most common emergency conditions in psychiatry
- States of psychomotor excitement, fugues and agitated states in intellectually deficient persons
- Iatrogenically induced emergency conditions in psychiatry, emergency conditions in affective disorders, in schizophrenia, insane psychoses
- Qualitative and quantitative disorders of consciousness and stupor as an emergency condition in psychiatry
- Consultative psychiatry
- The importance of the psychological in the emergence of the disease
- Somatic illness and psychological response

Exercises duration: 3 hours

- Familiarization with the way of work and specifics of the Department of emergency conditions in psychiatry
- Examples of emergency conditions in psychiatry from clinical practice
- Presentation of a patient with a mental disorder placed in the Department of Emergency Psychiatry
- Comorbidity of mental disorders and somatic diseases - liaison (consultative) psychiatry
- • Psychiatric consequences of cancer
- Surgical treatment and mental aspects of a person's functioning
- Psychiatric aspects of obstetrics and gynecology

Teaching Unit 15 (Fifteenth Week):

Subject: Ethical Aspects and Legal Regulation of Mental Disorders, Deontological Approach in Psychiatry, Forensic Psychiatry

Lecture duration: 3 hours

- Deontological approach in psychiatry
- Ethical principles in psychiatry
- Forensic - psychiatric expertise in criminal cases
- - legal field (reasonableness, safety measures of a medical nature)
- Forensic - psychiatric expert opinions in the civil - legal field (business ability, ability to draw up contracts, procedural ability, non-property damage expert opinion, primary and secondary fear expert opinion)
- Law on the rights of patients
- Law on Protection of Persons with Mental Disabilities

Exercises duration: 3 hours

- Getting to know the practical aspects of the implementation of legal regulations in the context of mental health
- Getting to know the practical aspects of forensic psychiatric expertise
