

**INTEGRATED ACADEMIC
STUDIES OF MEDICINE**

SIXTH YEAR OF STUDY

school year 2025/2026.

EMERGENCY MEDICAL CONDITIONS

Subject:

EMERGENCY MEDICAL CONDITIONS

The course is evaluated with 7 ECTS. There are 13 hours of active classes per week (4 hours of lectures and 9 hours of practice in a small group).

TEACHERS:

No	Name and surname	Email address	Title
1.	Vladimir Miloradovic	vanja.miloradovic@gmail.com	Full professor
2.	Goran Davidovic	medicusbg@yahoo.com	Full professor
3.	Ivan Cekerevac	icekerevac@gmail.com	Full professor
4.	Dejan Petrovic	dejanpetrovic68@sbb.rs	Full professor
5.	Predrag Djurdjevic	zekapeka@ptt.rs	Full professor
6.	Natasa Zdravkovic	silvester@sbb.rs	Full professor
7.	Violeta Iric Cupic	wwwvikica@ptt.rs	Full professor
8.	Svetlana Djukic	drsvetlanadjukic@gmail.com	Full professor
9.	Rada Vucic	rada.vucic@gmail.com	Associate professor
10.	Vladimir Ignjatovic	vladaig@yahoo.com	Assistant professor
11.	Miodrag Sreckovic	sreckovic7@gmail.com	Associate professor
12.	Vojislav Cupurdija	vojacup@gmail.com	Associate professor
13.	Mirjana Veselinovic	miraveselinovic.m@gmail.com	Full professor
14.	Violeta Mladenovic	vikicam2004@gmail.com	Associate professor
15.	Jelena Vuckovic	jelenavufi@gmail.com	Assistant professor
16.	Dusan Todorovic	drdusantodorovic@yahoo.com	Assistant professor
17.	Marina Markovic	maki.49@hotmail.com	Teaching assistant
18.	Tomislav Nikolic	marvin@sbb.rs	Assistant professor
19.	Anita Ivosevic	anitaivosevickg@gmail.com	Teaching assistant
20.	Zeljko Todorovic	todorovic_zeljko@hotmail.com	Assistant professor
21.	Stefan Simovic	simovicst@gmail.com	Teaching assistant
22.	Jelena Zivic	jelena.zy@gmail.com	Teaching assistant
23.	Biljana Vuletic	sibilkg@gmail.com	Full professor
24.	Andjelka Stojkovic	andja410@mts.rs	Full professor
25.	Marija Radovanovic	marijar9@verat.net	Assistant professor
26.	Sanja Knezevic	sanjaknez1980@yahoo.com	Assistant professor
27.	Svetlana Miletic-Drakulic	mileticdrakulic@gmail.com	Full professor
28.	Tatjana Boskovic Matic	stmatic769@gmail.com	Assistant professor
29.	Dejan Aleksic	drdeal1987@gmail.com	Assistant professor
30.	Ana Azanjac Arsic	ana.azanjac@yahoo.com	Assistant professor
31.	Aleksandar Gavrilovic	neuroja@sezampro.rs	Assistant professor
32.	Katarina Vesic	stojanovick@yahoo.com	Assistant professor
33.	Snezana Lazarevic	simovicsnezana2@gmail.com	Assistant professor
34.	Aleksandar Cvetkovic	777yu@yahoo.com	Associate professor
35.	Marko Spasic	drmspasic@gmail.com	Associate professor
36.	Bojan Milosevic	drbojanzm@gmail.com	Associate professor

37.	Bojan Stojanovic	bojan.stojanovi01@gmail.com	Associate professor
38.	Milos Arsenijevic	enraged6@yahoo.com	Associate professor
39.	Vojin Kovacevic	vojinkg@gmail.com	Associate professor
40.	Mladen Pavlovic	drmpavlovic@gmx.com	Assistant professor
41.	Danijela Jovanovic	danijeladrjovanovic@gmail.com	Assistant professor
42.	Milos Stankovic	milos_st_kg@yahoo.com	Teaching assistant
43.	Nenad Markovic		Assistant professor
44.	Nikola Prodanovic	nikolaprodanovickg@gmail.com	Assistant professor
45.	Goran Mihajlovic	goran.sm@eunet.rs	Full professor
46.	Dragana Ignjatovic Ristic	dristic4@gmail.com	Full professor
47.	Mirjana Jovanovic	drminjaj@yahoo.com	Full professor
48.	Vladimir Janjic	vladadok@yahoo.com	Full professor
49.	Nemanja Muric	nmuric91@gmail.com	Teaching assistant
50.	Milica Borovcanin	milicaborovcanin@yahoo.com	Full professor
51.	Branimir Radmanovic	biokg2005@yahoo.com	Associate professor
52.	Andra Jevtovic	andrajevtovic@gmail.com	Assistant professor
53.	Nenad Relic	nenadrelcmd@gmail.com	Teaching assistant
54.	Natalija Božović	miliczjevtic@gmail.com	Teaching assistant
55.	Mirjana Petrovic-Janicijevic	mira.andreja@yahoo.com	Full professor
56.	Sunčica Sreckovic	sunce.sun@yahoo.com	Full professor
57.	Svetlana Jovanovic	drsvetlanajovanovic@yahoo.com	Full professor
58.	Nenad Petrovic	nenadpet@yahoo.com	Associate professor
59.	Tatjana Sarenac Vulovic	tvoja.tanja@yahoo.com	Associate professor
60.	Biljana Popovska-Jovičić	biljanapop@yahoo.com	Associate Professor

COURSE STRUCTURE:

Module	Name of the module	Week	Lectures weekly	Work in a small group per week	Teacher
1.	Internal medicine, Pediatrics	6	4	9	Assoc. Professor Vojislav Ćupurdija
2.	Surgery, ENT, Ophthalmology	5	4	9	Assoc. Professor Vojislav Ćupurdija
3.	Infectious diseases, Neurology, Psychiatry	4	4	9	Assoc. Professor Vojislav Ćupurdija
					$\Sigma 60+150=210$

ASSESSMENT: The grade is equivalent to the number of points earned (see tables). The final grade is formed based on the number of points earned through pre-exam activities, grading of seminar papers, and the final exam.

PRE-EXAM ACTIVITIES: Each department may, at its own discretion, partially or completely organize practical exercises in the form of "on-call hours", so that the equivalent time is calculated, e.g. 6 hours of practical exercises can be replaced with 6 hours of "on-call" duty. The readiness and education of students for working with patients in solving emergency situations will be assessed during practical exercises/on-call. During the course, each group is required to spend one shift in the Emergency Medical Assistance Department. Through activity during classes, a student can earn 0-1 point per week, up to a maximum of 15 points during the semester.

Students who do not gain more than 50% of points in the pre-exam activities, take the activity during the exam period by answering 2 questions from each of the modules they did not pass.

MODULE	MAXIMUM POINTS
	activity during class
1	6
2	5
3	4
Σ	15

SEMINAR PAPERS: During the course, students write 3 seminar papers (1 for each teaching module), on topics selected from the list provided by each department. Each seminar paper is graded with 0-5 points, up to a maximum of 15 points during the semester.

MODULE	MAXIMUM POINTS
	seminar papers
1	5
2	5
3	5
Σ	15

FINAL EXAM: In this way, a student can earn up to 70 points. The student takes a test of 35 questions from the entire course material. If the student does not get more than 50% of the correct answers, he/she has not passed the final exam.

FINAL EXAM
0-70 POINTS

The test has 35 questions. Each question is worth 2 points.

The final grade is formed as follows:

In order to pass the course, a student must earn a minimum of 51 points, pass the pre-exam activities in all modules, complete 3 seminar papers, and pass the final exam (test).

number of points scored	grade
0 - 50	5
51 - 60	6
61 - 70	7
71 - 80	8
81 - 90	9
91 - 100	10

CONSULTATIVE TEACHING: In agreement with the assistant for a given thematic unit.

SCHEDULE

LECTURE

WEDNESDAY

LITERATURE:

Module	Name of the Textbook	Authors	Publisher	Available in the Library
Internal Medicine	INTERNAL MEDICINE 1 and 2	Prof. Dr. Dragoljub Manojlović and colleagues	University of Belgrade, Faculty of Medicine	Yes
Pediatrics	EMERGENCIES IN PEDIATRIC	Prof. Dr. Jasmina Knežević and colleagues	University of Kragujevac	Yes
Neurology	NEUROLOGY BASICS OF NEUROLOGICAL EXAMINATION	Kostić et al	University of Belgrade, Faculty of Medicine	Yes
Surgery	SURGERY FOR MEDICAL STUDENTS	Editor Prof. Dr. Živan Maksimović	Faculty of Medicine in Belgrade	Yes
Infective diseases	INFECTIVE DISEASES	M. Božić et al.	Faculty of Medical Sciences, Kragujevac	Yes
Psychiatry	PSYCHIATRY	S. Đukić Dejanović and associates		Yes
Ophthalmology	OPHTHALMOLOGY	S. Golubović et al	University of Belgrade, Faculty of Medicine	Yes
ENT	ENT with maxillofacial surgery	Prof. Dr. Branislav Belic	Faculty of Medical Sciences, Kragujevac	Yes
Internal and Surgical Disciplines	EMERGENCIES IN MEDICINE	Mileta Poskurica et al.	University of Kragujevac, Medical	Yes

All lectures are available on the website of the Faculty of Medical Sciences: www.medf.kg.ac.rs

PROGRAM:

FIRST MODULE

TEACHING UNIT 1 (FIRST WEEK):

INTERNAL MEDICINE-CARDIOLOGY

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none">• Acute cardiac arrest and cardiopulmonary resuscitation• Sudden cardiac death• Acute pulmonary edema• Acute coronary syndrome• Malignant heart rhythm disorders• Acute heart failure• Hypertensive crisis	<ul style="list-style-type: none">• Introduction to the basic principles of cardiopulmonary resuscitation• Recognition of malignant heart rhythm disorders on the ECG and therapeutic approach• Visit to the resuscitation room of the Emergency Center and familiarization with the equipment for carrying out cardiopulmonary resuscitation• Diagnostic procedures in acute coronary syndrome• Recognition of ischemia on ECG or monitor• Recognition of the signs of aortic dissection• Adopt the basic therapeutic principles in terms of the use and dosage of antiplatelet, anticoagulant, fibrinolytic and other symptomatic therapy, as well as another modality of care for acute coronary syndrome in the form of percutaneous coronary interventions• Recognize the clinical picture of heart failure and therapeutic approach• Algorithm in the treatment of pulmonary edema

TEACHING UNIT 2 (SECOND WEEK):

INTERNAL MEDICINE-PULMONOLOGY/ALLERGOLOGY

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none">• Acute exacerbation of chronic respiratory failure• Hemoptysis• Pulmonary thromboembolism• ARDS• Acute asthma attack• Anaphylactic shock• Angioedema	<ul style="list-style-type: none">• Learn about the aggravating factors and clinical manifestations of acute exacerbation of chronic respiratory failure.• Learn how to interpret gas analysis, recognize the symptoms and signs of hypoxemia and hypercapnia.• Principles of oxygen therapy• Therapeutic approach in chronic respiratory failure deterioration• Indications for non-invasive and invasive mechanical ventilation• Basic causes and approach to the patient with hemoptysis• Presentation of a patient with pulmonary embolism• Analysis of tests necessary for correct dosage of anticoagulant drugs• Clinical presentations and therapeutic approach in ARDS• Interpret the chest X-ray• Determine the presence of free fluid in the pleural cavity and perform a pleural puncture• Recognize the signs of pneumothorax

TEACHING UNIT 3**(THIRD WEEK):****INTERNAL MEDICINE/NEPHROLOGY/GASTROENTEROLOGY**

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none"> • Acute renal failure • Differential diagnosis of hematuria • Urgent conditions in electrolyte, fluid and acid-base balance disorders • Conservative approach to gastrointestinal bleeding 	<ul style="list-style-type: none"> • Most important symptoms and signs of acute renal failure • Treatment of patients with acute renal failure • Treatment of patients with nephritic syndrome • Diagnostic algorithm for acute renal failure • Analysis of acute renal failure complications • Monitoring of patients with acute renal failure • Treatment of acute renal failure: treatment of hyperkalemia • Clinical characteristics of acute nephritic syndrome Indications for acute hemodialysis in patients with acute renal failure • Differential diagnosis of acute abdominal pain • Recognize symptoms, signs and complications of ulcer disease • Learn about the emergency conditions of pancreatic disease such as bleeding, rupture, infection in the field of pseudocyst in acute pancreatitis • Recognize clinical manifestations and therapeutic approach in patients with hepatic coma.

TEACHING UNIT 4**(FOURTH WEEK):****INTERNAL MEDICINE-ENDOCRINOLOGY/HEMATOLOGY**

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none"> • Acute complications of diabetes (ketoacidosis, non-ketogenic hyperosmolar coma, hypoglycemia) • Addison's crisis • Pheochromocytoma • Thyrotoxic crisis • Acute hemorrhagic syndrome • Transfusion of blood and blood derivatives - complications • Febrile neutropenia • Hyperviscosity syndrome 	<ul style="list-style-type: none"> • Introduction to the criteria for acute complications of diabetes and the most common causes (most important symptoms and signs of the disease, diagnostic algorithms for additional testing, principles of treatment of acute complications of DM) • Most important symptoms and signs, diagnostic algorithm for examination and the basic principles of treatment of hypocorticism, hypothyroidism and pheochromocytoma • Introduction to basic manifestations of hemorrhagic syndrome • Introduction of the basic diagnostic procedures and therapeutic modalities used in the diagnosis and treatment of hemorrhagic syndromes • Treatment of patients with hemorrhagic syndrome • Introduction to indications, contraindications and adverse reactions during the transfusion of blood and blood derivatives

**TEACHING UNIT 5
(FIFTH WEEK):**

PEDIATRICS

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none"> • Pediatric cardiopulmonary resuscitation • Acute heart rhythm disorder in children • Acute poisoning in children • Acute respiratory failure in children 	<ul style="list-style-type: none"> • Introducing students to the causes of cardiopulmonary arrest in children and the specifics of cardiopulmonary resuscitation • Opening the upper airways and introducing an airway • Artificial ventilation • Heart massage • Presentation of the most common rhythm disorders in children, ECG monitoring and therapeutic approach • Presentation of the pediatric patient with signs of acute respiratory failure and treatment • Foreign object in the respiratory tract

**TEACHING UNIT 6
(SIXTH WEEK):**

PEDIATRICS

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none"> • Acute gastroenterocolitis in children • Acute asthma exacerbation in children • Hemorrhagic syndrome in children • Acute neurological disorder in children 	<ul style="list-style-type: none"> • Presentation of the most common causes of acute gastroenterocolitis and the principles of rehydration in children • Placement of a nasogastric tube • Presentation and therapeutic approach in acute severe asthma attack • Administration of oxygen treatment - nasal catheter and mask • Placement of pulse oximeter and monitor • Use of a nebulizer • Most common causes of hemorrhagic syndrome and therapeutic approach • Clinical presentation and therapeutic approach to patients with acute neurological disorders in children • Neurological examination of the child and meningeal signs

SECOND MODULE

TEACHING UNIT 7 (SEVENTH WEEK):

SURGERY

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none">• Cardiopulmonary resuscitation• Hypovolemic shock• Balance of water and electrolytes	<ul style="list-style-type: none">• Master the knowledge about the distribution of body water in an adult surgical patient and the balance of water in the body• Recognition of basic facts about disorders of water and electrolyte exchange. Interpretation of arterial blood gas analysis.• Recognition of acid-base balance disorders• Level I - basic resuscitation, mastering the skills of airway control, artificial respiration and circulatory support• Demonstration of advanced resuscitation measures. Demonstration of the heart defibrillator. Demonstration of the principle of prolonged resuscitation - assessment of brain functions.• Recognition of shock of different etiology, differential diagnosis.• Definition of disorders of the heart pump function and peripheral circulation• Identifying the factors that cause hypovolemia: loss of blood, water and/or electrolytes.

TEACHING UNIT 8 (EIGHTH WEEK):

SURGERY

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none">• Craniocerebral injuries• Chest injuries• Injuries of the genitourinary tract• Renourethral colic	<ul style="list-style-type: none">• Classification of craniocerebral injuries• Fractures of the base of the skull• Determining the disturbance of the state of consciousness according to the Glasgow Coma Scale• Examination of a polytraumatized patient with a disturbed state of consciousness and preparation for transport• Diagnostics of craniocerebral injuries• Treatment of the wound and its surroundings in the hairy part of the head• Removal of sutures after treated head injuries• Recognition of the signs of pneumothorax• Diagnostic procedures for abdominal injury• Recognize subcutaneous emphysema• Determination of the presence of free fluid in the pleural cavity• Symptomatology, diagnosis and therapeutic approach in renal colic

**TEACHING UNIT 9
(NINTH WEEK):**

SURGERY

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none"> • Injuries of the extremities • Urgent injuries of blood vessels • Acute occlusions of large arteries • Deep vein thrombosis 	<ul style="list-style-type: none"> • Practice with patients, assessment of skeletal integrity, fracture signs, joint range of motion, presence of swelling, effusion, deformity, skin assessment, tendon integrity and neurovascular findings • Interpretation of radiographs in case of limb injuries • Immobilization of the extremities • Hemostasis with a compression bandage • Hemostasis by digital compression • Performing Homans test • Venipuncture

**TEACHING UNIT 10
(TENTH WEEK):**

SURGERY

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none"> • Bleeding from the gastrointestinal tract • Acute abdomen • Treatment of multisystem injuries • Abdominal and pelvic injuries • Surgical treatment of the wound • Thermal injuries and burns 	<ul style="list-style-type: none"> • The student acquires knowledge about the etiology of diseases of the stomach and duodenum, clinical presentation, differential diagnosis and treatment modalities for bleeding from the digestive tract. • The student acquires knowledge about the definition of acute abdomen, etiology, and clinical presentation, differential diagnosis and treatment modalities of acute abdomen. • The student acquires knowledge about the management of multisystemic injuries • Determine the existence of free fluid in the abdomen • Determine the existence of peritoneal irritation • Check for signs of ileus • The student acquires knowledge of surgical shaving • Clinical presentation of extensive burns and stages of development • Treatment of burns

**TEACHING UNIT 11
(ELEVENTH WEEK):**

ENT/OPHTHALMOLOGY

Lectures 2 hours	Practice 5 hours
<ul style="list-style-type: none"> Urgent conditions in ENT medicine 	<ul style="list-style-type: none"> Approach to a patient with a nosebleed Recognition of otogenic and sinusogenic complications Procedure for patients with foreign objects of the ear, nose, pharynx and larynx. Procedure with patients with acute respiratory failure

ENT/OPHTHALMOLOGY

Lectures 2 hours	Practice 5 hours
<ul style="list-style-type: none"> Urgent conditions in ophthalmology – introduction. Acute glaucoma attack Retinal occlusive syndromes Retinal ablation Cavernous sinus thrombosis Endophthalmitis and panophthalmitis Contusion, perforation, chemical and thermal eye injuries Urgent neuro-ophthalmological diseases 	<ul style="list-style-type: none"> Acute □ glaucoma attack - clinical presentation, how to diagnose and treat retinal occlusive syndromes and retinal ablation Cavernous sinus thrombosis Endophthalmitis and panophthalmitis Contusion, perforation, chemical and thermal injuries of the eye - anamnesis, recognition of the clinical presentation of the injuries, provide first aid in the treatment of eye injuries and adequate urgent therapy

THIRD MODULE

**TEACHING UNIT 12
(TWELFTH WEEK):**

INFECTIVE DISEASES

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none"> Sepsis Infections of the central nervous system Snake bite. 	<ul style="list-style-type: none"> Introducing the student to the pathogenetic mechanism of sepsis and septic shock and the principles of empiric antibiotic therapy Clinical symptoms and clinical signs of meningeal syndrome and the principles of anti-edematous therapy Principles of lumbar puncture and care of patients with neuroinfection Acquiring knowledge about the most common poisonous snakes in our region, and getting to know the pathogenesis of local changes and systemic manifestations after the bite of poisonous snakes Application of antiviperinum serum Basic principles of desensitization and application of animal serum Treatment of patients with anaphylactic shock

**TEACHING UNIT 13
(THIRTEENTH WEEK):**

NEUROLOGY

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none"> • Coma • Acute stroke • Epileptic status 	<ul style="list-style-type: none"> • Anamnesis (heteroanamnesis) and focused physical examination in an emergency patient • Examination of the patient's state of consciousness • Scales for assessing the depth of coma • Performing neurological examination • Performing meningeal signs examination

**TEACHING UNIT 14
(FOURTEENTH WEEK):**

NEUROLOGY/PSYCHIATRY

Lectures 2 hours	Practice 5 hours
<ul style="list-style-type: none"> • Coma • Acute stroke • Epileptic status 	<ul style="list-style-type: none"> • Recognition of patients with intracerebral hemorrhage • Differential diagnosis and therapy of different types of stroke • Clinical presentation and differential diagnosis in patients with serial epileptic seizures • Treatment of patients with serial epileptic seizures

NEUROLOGY/PSYCHIATRY

Lectures 2 hours	Practice 5 hours
<ul style="list-style-type: none"> • Most common emergency conditions in psychiatry • State of psychomotor excitement, agitated states in intellectually deficient persons • Emergency conditions in affective disorders 	<ul style="list-style-type: none"> • Introduction to the most common urgent conditions in psychiatry. • Differentiation of the specificities of clinical presentations and differential diagnostic uncertainties

**TEACHING UNIT 15
(FIFTEENTH WEEK):**

PSYCHIATRY

Lectures 4 hours	Practice 10 hours
<ul style="list-style-type: none"> • Emergency conditions in schizophrenia, delusions and psychosis in general • Stupor like emergency conditions in psychiatry • Emergency conditions within addictive diseases • Acute psychoorganic syndrome • Chronic psychoorganic syndrome • Approach to a violent patient 	<ul style="list-style-type: none"> • Introduction to the specificities in admission of these patients in hospital conditions (voluntary consent, involuntary hospitalization, precautionary measures...) • Recognition of clinical presentation, diagnostics and therapeutic modules of emergency conditions within the framework of addiction.

LESSON SCHEDULE FOR THE SUBJECT EMERGENCY MEDICAL CONDITIONS

Module	Week	Type	Method unit name	Lecturer
1	1	Lecture	Acute cardiac arrest and cardiopulmonary resuscitation. Sudden cardiac death. Acute pulmonary edema. Acute coronary syndrome. Malignant heart rhythm disorders. Acute heart failure. Hypertensive crisis.	Full Prof. Goran Davidović
1	1	Practice		Full Prof. Goran Davidovic Asst. Prof. Vladimir Ignjatovic Asst. Prof. Jelena Vuckovic Assoc. Prof. Miodrag Srećkovic
1	2	Lecture	Acute exacerbation of chronic respiratory failure. Hemoptysis. Pulmonary thromboembolism. ARDS. Acute asthma attack. Anaphylactic shock. Angioedema	Assoc. Prof. Vojislav Cupurdija Full Prof. Mirjana Veselinovic
1	2	Practice		Assoc. Prof. Vojislav Cupurdija Full Prof. Mirjana Veselinovic Assoc. Prof. Miodrag Srećkovic Asst. Prof. Vladimir Ignjatovic
1	3	Lecture	Acute renal failure. Differential diagnosis of hematuria. Urgent conditions in disorders of electrolytes, fluids and acid-base balance. Conservative approach to gastrointestinal bleeding.	Assoc. Prof. Tanja Lazarevic Full Prof. Natasa Zdravkovic
1	3	Practice		Assoc. Prof. Tanja Lazarevic Teaching Assistant Jelena Zivic Asst. Prof. Tomislav Nikolic Teaching Assistant Anita Ivosevic Asst. Prof. Vladimir Ignjatovic

LESSON SCHEDULE FOR THE SUBJECT EMERGENCY MEDICAL CONDITIONS

Module	Week	Type	Method unit name	Lecturer
1	4	Lecture	Acute complications of diabetes (ketoacidosis, non-ketogenic hyperosmolar coma, hypoglycemia). Addison's crisis. Pheochromocytoma. Thyrotoxic crisis. Acute hemorrhagic syndrome. Transfusion of blood and blood derivatives – complications. Febrile neutropenia. Hyperviscosity syndrome	Asst. Prof. Violeta Mladenovic Full. Prof. Svetlana Djukic
1	4	Practice		Asst. Prof. Violeta Mladenovic Full. Prof. Svetlana Djukic Asst. Prof. Danijela Jovanovic Asst. Prof. Zeljko Todorovic Teaching Assistant Jelena Zivic
1	5	Lecture	Pediatric cardiopulmonary resuscitation. Acute heart rhythm disorder in children. Acute poisoning in children. Acute respiratory failure in children.	Asst. Prof. Sanja Knezevic Full Prof. Andjelka Stojkovic
1	5	Practice		Full Prof. Biljana Vuletic Full Prof. Andjelka Stojkovic Asst. Prof. Sanja Knezevic Asst. Prof. Marija Radovanovic
1	6	Lecture	Acute exacerbation of asthma in children. Hemorrhagic syndrome in children. Acute neurological disorder in children. Acute gastroenterocolitis in children.	Full Prof. Andjelka Stojkovic Full Prof. Biljana Vuletic Asst. Prof. Sanja Knezevic Asst. Prof. Marija Radovanovic

LESSON SCHEDULE FOR THE SUBJECT EMERGENCY MEDICAL CONDITIONS

Module	Week	Type	Method unit name	Lecturer
1	6	Practice		Full Prof. Biljana Vuletic Full Prof. Andjelka Stojkovic Asst. Prof. Sanja Knezevic Asst. Prof. Marija Radovanovic
2	7	Lecture	Cardiopulmonary resuscitation. Hypovolemic shock. Water and electrolyte balance.	Assoc. Prof. Nenad Zornic
2	7	Practice		Assoc. Prof. Bojan Milosevic Assoc. Prof. Marko Spasic Assoc. Prof. Bojan Stojanovic Asst. Prof. Ivan Radosavljevic Asst. Prof. Nenad Markovic Asst. Prof. Nikola Prodanovic
2	8	Lecture	Bleeding from the gastrointestinal tract. Acute abdomen. Abdominal and pelvic injuries. Management of multisystemic injuries. Surgical care of the wound. Thermal injuries.	Assoc. Prof. Aleksandar Cvetkovic
2	8	Practice		Assoc. Prof. Bojan Milosevic Assoc. Prof. Marko Spasic Assoc. Prof. Bojan Stojanovic Asst. Prof. Ivan Radosavljevic Asst. Prof. Nenad Markovic Asst. Prof. Nikola Prodanovic
2	9	Lecture	Craniocerebral injuries. Chest injuries.	Assoc. Prof. Vojin Kovacevic Assoc. Prof. Milos Arsenijevic

2	9	Practice		Assoc. Prof. Bojan Milosevic Assoc. Prof. Marko Spasic Assoc. Prof. Bojan Stojanovic Asst. prof. Ivan Radosavljevic Asst. prof. Nenad Markovic Asst. prof. Nikola Prodanovic
2	10	Lecture	Injuries of the extremities. Urgent injuries of blood vessels. Acute occlusions of large arteries. Inflammation of deep veins.	Asst. prof. Nikola Prodanovic Assoc. Prof. Bojan Stojanovic
2	10	Practice		Assoc. Prof. Bojan Milosevic Assoc. Prof. Marko Spasic Assoc. Prof. Bojan Stojanovic Asst. prof. Ivan Radosavljevic Asst. prof. Nenad Markovic Asst. prof. Nikola Prodanovic
2	11	Lecture	Urgent conditions in ENT medicine. Bleeding in the ENT region. Respiratory failure and tracheotomy. Injuries of the ENT region and foreign objects. Complications of inflammatory processes in the ear, nose, pharynx and larynx. Urgent conditions in ophthalmology - introduction. Acute glaucoma attack. Retinal occlusive syndromes Retinal ablation. Cavernous sinus thrombosis. Endophthalmitis and panophthalmitis. Contusion, perforation, chemical and thermal eye injuries. Urgent neuro-ophthalmological diseases.	Full Prof. Branislav Belic Full Prof. M. Janicijevic Petrovic
2	11	Practice		Asst. prof. Andra Jevtovic Dr Nenad Relic Dr Natalija Bozovic Full Prof. M. Janicijevic Petrovic Full Prof. Svetlana Jovanovic Full Prof. Suncica Sreckovic Assoc. Prof. Nenad Petrovic Assoc. Prof. Tatjana Sarenac Asst. prof. Dusan Todorovic
3	12	Lecture	Sepsis. Infections of the central nervous system. Snake bite.	Assoc. Prof. Biljana Popovska Jovicic

3	12	Practice		Assoc. Prof. Biljana Popovska Jovicic Teaching Assistant Sara Petrović Dr Nemanja Đorđević
3	13	Lecture	Coma. Acute stroke. Epileptic status.	Full Prof. Svetlana Miletic Drakulic Asst. Prof. Tatjana Bosković Matic Asst. Prof. Aleksandar Gavrilovic
3	13	Practice		Full Prof. Svetlana Miletic-Drakulic Asst. Prof. Tatjana Boskovic Matic Asst. Prof. Aleksandar Gavrilovic Asst. Prof. Dejan Aleksic Asst. Prof. Ana Azanjac Arsic Asst. Prof. Snezana Lazarevic Asst. Prof. Katarina Vesic
3	14	Lecture	Coma. Acute stroke. Epileptic status. Most common emergency conditions in psychiatry. Conditions of psychomotor excitement, fugue and agitated states in intellectually deficient persons. Urgent conditions in affective disorders.	Full Prof. Svetlana Miletic Drakulic Asst. Prof. Tatjana Bosković Matic Asst. Prof. Aleksandar Gavrilovic Full Prof. Mirjana Jovanovic
3	14	Practice		Full Prof. Svetlana Miletic-Drakulic Asst. Prof. Tatjana Boskovic Matic Asst. Prof. Aleksandar Gavrilovic Asst. Prof. Dejan Aleksic Asst. Prof. Ana Azanjac Arsic Asst.
